Dr. E. W. BROWN, Oculist,
RESPECTFULLY tenders his professional services to the citizens of upper Missouri and the Kansas Territory. Having carried on an Eye Infirmary for several years past in Platte city, Mo., and having treated a large number of patients with almost every description of diseased Eyes, he flatters himself that he will be able to give satisfaction to all who may desire his services. His infirmary buildings are large and fitted up so that patients are not only well accommodated but under his immediate care. The cost of being cured at his establishment is comparatively small when traveling and other expenses to St. Louis or to some distant point are considered. Persons having children laboring under long continued scrofulous disease of the Eyes are most positively assured that they can get them cured at his infirmary. Dr. Brown would, also, most respectfully invite the attention of the medical profession throughout the country to his establishment, and if cases of diseased Eyes should spring up in their practice that can only be treated successfully at his eye infirmary he would be much pleased to have them recommended to him. If any further information is wanted, call on Capt. Eastin, or W. H. Adams, at the Herald office.

THOMAS GREY & EDWARD BOYLE

GREY & BOYLE,
BOILER MAKERS, BLACKSMITHS,
AND SHEET IRON WORKERS,
(Main Street, between Carr and Cherry.)
St. Louis, Mo.

HAVING gone to a very great expense to

herect machinery for blacksmiths, making boilers, and sheet iron work, on the most approved Eastern plan, we are now prepared to furnish everything belonging to our business ten per cent cheaper than our rivals in the West. This town was laid off and located in February last, on a tract of land densely timbered, easy of access from the surrounding country and situated favorably for health. Already there are a number of houses going up. It has the following resources as a good and prominent point:
Firstly—A Good Landing.
The Missouri river at this point is compressed within a narrow space, the channel is remarkably deep on the Delaware side, and washes for a mile above and below the Kansas shore, thus affording at all times a safe and secure landing for steamers.
Secondly—Timber in Abundance.
The tract of land on which the town is laid out, is covered with valuable timber, for building purposes, besides this, there is on the opposite side of the river a large bottom, heavily timbered with Oak, Ash and Walnut.
Thirdly—Its Position.
This town has on the Kansas side of the river, supporting it a large district of the very best lands in the Territory; while on the other side of the river there is a large and fertile bottom, teeming with population, this bottom is of itself sufficient to sustain a town of large size. This is the accessible point from which the Delaware nation of Indians can procure the supplied Delaware is the nearest and most accessible point at which the country on the Kansas river, can do their receiving and forwarding business. There are a number of towns on the Kansas river, but it will find it to their interest to make this place their shipping point, among them we would name Oswakee, Calhoun and others. As there is a good ferry at the point, emigrants travelling to Kansas Territory on the Missouri river, from St. Louis to St. Joseph, will find that this is the proper point at which to enter the territory, by this means they avoid a great deal of unnecessary travel.
Health.
This location is high and commanding, having no stagnant water near to generate disease—from its streets is presented to the eye, an splendid view of the Missouri river and the bottom below town the country in the vicinity presenting a view at once pleasing and romantic.
Every inducement will be given to merchants to make Delaware the place of their choice. We ask each person to examine the place. Merchants will find, on examination, that Delaware is obliged to command a trade not second to any town in the Territory: from such persons we ask an examination. In a word, we ask for Delaware and examination for the public.
